COPSOQ II

The scales of the MEDIUM SIZE COPSOQ II questionnaire.

The purpose of this paper is to describe the scales and items of the medium size questionnaire of the COPSOQ II. The questionnaire was developed on the basis of a survey of a representative sample of adult Danes aged 20-59 years. A total of 4,732 persons responded of whom 3,517 were employees. The response rate was 60.4% and 52% of the respondents were women. The population of 3,517 employees comprise the study base for the analyses described in the following.

As a rule we have been aiming for scales with 3-4 questions (items) per scale. It is our experience that this gives sufficient reliability and precision.

New items and scales, which were not part of COPSOQ I, are in *italics*. The numbers correspond to consecutive numbers in the original test-questionnaire.

Most of the questions in COPSOQ II have five response options. These are:
1. Always, Often, Sometimes, Seldom, Never/hardly ever. (Called *(Always …)* in this paper).
2. To a very large extent, To a large extent, Somewhat, To a small extent, To a very small extent. (Called *(To a very large …)* in this paper).

**Scoring of the scales**

All the scales of COPSOQ are scored 0-100 points. (The exception is the short questionnaire in which a very simple scoring system is used). The five response options are scored 100, 75, 50, 25, 0. In case of only four response options the scores are 100, 66.7, 33.3, 0. The total score on a scale for a respondent is the average of the scores on the individual items. A person is considered missing if less than half of the questions in a scale have been answered.

High scores correspond to high values on the respective dimensions. Thus, a high score on burnout means a high burnout level, and a low score on influence means a low level of influence at work. In most cases high levels are “good” or “healthy”. The exceptions are quantitative demands, work pace, emotional demands, role conflicts, work-family conflict, burnout, stress, and sleeping problems.

A few of the questions are scored with “reversed scoring”. This is indicated in the text below at all the relevant places.
